

## PRODUCT INFORMATION

### Greases

## Gulf Crown USG 2.5

#### *Product Description:*

**Gulf Crown USG 2.5** is a lithium-calcium grease based on mineral base oils. **Gulf Crown USG 2.5** contains anti-wear additives, anti-oxidants and an important amount of corrosion inhibitors. **Gulf Crown USG 2.5** also contains polymer to enhance adhesion. **Gulf Crown USG 2.5** in marine applications outperforms traditional calcium and lithium greases with respect to water resistance, temperature range, mechanical stability and load carrying capacity. **Gulf Crown USG 2.5** has enhanced rust protection, excellent load carrying capacity, good oxidation stability and outstanding water resistance.

#### *Application:*

**Gulf Crown USG 2.5** is used for the lubrication of rudders, steering quadrants and other bearings and gears on board of ship, including fish sorting machines, anchor winches and stern tubes. "One single grease for all lubricating points on board".

Gulf Crown USG 2.5	
Consistency, ASTM D217	NLGI 2-3
Product Code	5026
<b>SPECIFICATIONS:</b>	
ISO 6743-9	L-XBCIB2-3
DIN 51 502	KP2-3K-20
<b>PROPERTIES:</b>	
Colour	Light brown
Dropping Point, °C	>160
Viscosity base oil @ 40°C/100°C, mm <sup>2</sup> /s	520/33
Penetration 60 strokes, ISO 2137, mm/10	250-265
Temperature range continuous operation, °C	-20 tot +130
