White Oil

Gulf Industrial White Oil

Product Description:

Gulf Industrial White Oil is a saturated cyclo-paraffin hydrocarbon based mineral oil, for applications that call for non-staining light viscosity products such as those found in textile machinery twister rings, sewing machine parts, knitting machines and for base materials for manufacture of plastic, rubber, chemical, insecticides and other industries.

Typical Properties:

Product Code Nr.	9642
ISO VG	15
Density at 15°C, kg/m ³	885
Viscosity at 100°C, mm ² /s	3.6
Flash Point, °C	185
Pour Point, °C	-12

Performance Specifications:

WOMA	1006
------	------

Recommended Applications:

Typical applications in the textile industry are oil lubricated twister rings, sewing machine parts, circular hosiery knitting machines and double knitting machines.

Suited for use in slitter applications in the paper industry

Due to its light viscosity it can be used for spraying in slitter applications

Gulf Industrial White Oil **cannot** be used in the medical or food industry where food can contaminate with the lubricant

Features/Benefits:

- **Gulf Industrial White Oil** is acid-free, colourless and odourless
